1. Nothing to eat or drink 2 hours prior to CT scan.
2. Are you Diabetic? YES or NO
3. Are you on any diabetic medications? If yes, see list of medications that need STOPPED before contrast is administered.
4. If you are pregnant, or think you may be, please call before coming to the appointment.
5. Please get a serum creatinine 1 – 7 days before the CT scan (the order is enclosed). You may take this order to any lab of your choice they will fax the results to us.
6. You or your insurance will be billed separately by the Radiologist for interpretation.
7. Please read the disclosure on the back; contact our office if you prefer to have your CT at another facility.

Effingham Urology Associates, S.C.

Your Effingham Urology provider has recommended and ordered CT imaging as a tool to either diagnosis, treat or manage your current urological condition.

The federal government now requires us to provide you with information about the CT services provided in our office.

The CT is leased by Dr. Nayak, the owner of Effingham Urology and therefore may earn income from the CT services provided in our office.

The CT services and equipment used by Effingham Urology have been certified through the American College of Radiology. Our CT technologists are licensed by the state of Illinois. Effingham Urology follows all rules and regulations established by governing agencies to insure quality and safety for our patients. All CT images are read by a licensed radiologist.

Although the CT image is recommended for the diagnosis, treatment or medical management of your condition, it is not required that you receive the imaging services at Effingham Urology. You can elect to have your imaging performed at another facility of your choosing. The closest other CT imaging facilities are:

-
- American
 - St. Anthony's Memorial Hospital
 - Hospital of your choice

Please contact 217-342-9738 with any questions.
